Location:	Suriyawan Road, Bankat Khas, UP 221308
Phone:	+91 7307594163
Website:	apnabaithakcafe.vercel.app
Delivery radius:	10 km
Delivery ETA:	25-35 minutes
Menu items:	16+ (Pizza, Burger, Sandwich, Pasta, Chaat, etc.)
Payment modes:	Cash on Delivery, UPI

This document shows every screen a new customer sees,
from opening the installed app to receiving their order.

1

STEP 1

Open the installed app

After installing the PWA via the QR code, the customer taps the Apna Baithak icon on their phone home screen. The app opens to the home screen showing the brand logo, delivery bar, search, category rail, and featured items. The bottom-right shows 'Sign in' because the customer is not yet logged in.

Screenshot: journey-01-home-not-logged-in.png

2

STEP 2

Tap 'Sign in' (bottom-right corner)

Tapping the 'Sign in' button opens the authentication screen. The customer sees a 'Welcome back!' heading, a 'Continue with Google' button for one-tap login, and email + password fields. A 'Sign up' link is available at the bottom for first-time customers.

Screenshot: journey-02-sign-in-screen.png

3

STEP 3

Tap 'Sign up' to create an account

First-time customers tap 'Sign up' at the bottom of the sign-in screen. The 'Create your account' form appears with 4 fields: Full Name, Contact Number (required for delivery, prefixed with +91), Email, and Password.

Apna Baithak DELIVER TO • 25-35 MIN Select delivery location  Home  Menu  Cart  Sign in

4

STEP 4

Fill the form and tap 'Create account'

The customer enters their name, phone number, email, and password, then taps 'Create account'. Supabase creates the account and sends a verification email.

Screenshot: journey-04-after-signup.png

4b

STEP 4b

Email verification screen

After signup, a verification screen appears: 'Verify your email -- We have sent a verification email to [their email]'. Open your email and click the Verify Email link to activate your account.' The customer must leave the app, open their email inbox, and click the verification link before they can sign in.

Screenshot: journey-04b-email-verification.png

5

STEP 5

Return to the sign-in screen

After clicking the verification link in their email, the customer returns to the app and taps 'Back to sign in' to proceed to the login form.

The screenshot shows the Apna Baithak app interface. At the top, there's a header with the app logo, delivery status (DELIVER TO • 25-35 MIN, Select delivery location), and navigation buttons (Home, Menu, Cart, Sign in). The main section is titled 'Create your account' with a subtext 'Sign in to place your order. Browse the menu freely without logging in.' Below this is a 'Continue with Google' button. A horizontal line with 'OR' in the center separates the Google button from the form fields. The form fields are: 'Full Name' (Journey Test User), 'Contact Number' (9999900000, with a note 'Required for delivery — we'll call/SMS on this number.'), 'Email' (journeytest1789915281@gmail.com), and 'Password' (masked with dots).

7

STEP 7

Logged in -- home page

After successful login, the bottom-right button changes from 'Sign in' to the customer's name. The 'DELIVER TO' bar still says 'Select delivery location' because no address has been saved yet.

Screenshot: journey-07-after-login.png

8

STEP 8

Home page (logged in, no address yet)

The home page now shows personalized content. The customer can browse featured items and categories, but needs to set a delivery address before they can place an order.

Screenshot: journey-08-home-logged-in.png

9

STEP 9

Tap 'DELIVER TO' to set delivery location

Tapping the 'DELIVER TO' bar at the top opens a full-screen location picker with a search box, an interactive map showing the restaurant's location, a 'Use current location' button (GPS), and an 'Add New Address' link.

Screenshot: journey-09-location-picker.png

10

STEP 10

Search for their area

The customer types their area name, landmark, or pincode in the search box. For example, typing 'Suriyawan' returns geocoded results. Search results appear as tappable buttons below the search box.

Screenshot: journey-10-location-search.png

Tap the matching search result

The customer taps the correct search result. The map zooms to that location with a pin marker. The selected address appears at the top of the map. If the location is outside the 10 km delivery radius, a red warning appears and the 'Confirm and Proceed' button stays disabled.

Screenshot: journey-11-location-selected.png

Fill the address details form

Below the map, an 'Address Details' form appears. The customer selects an address type (Home / Work / Other), then fills: House/Flat No. (required), Street/Area (required), Landmark (optional), City (required, auto-filled from geocoding), and PIN Code (required, auto-filled). Once all fields are valid and the location is within 10 km, the 'Confirm and Proceed' button becomes enabled.

The screenshot shows a mobile application interface for selecting a location. At the top, there is a back arrow and the title "Select Your Location". Below this is a search bar containing the text "Gyanpur Bus Stand". Under the search bar, there are three tabs: "Home" (selected), "Work", and "Other". The "Address Details" section contains the following fields:

- House / Flat No. ***: 12A
- Street / Area ***: Main Road, Near Temple
- Landmark**: Suriyawan Bus Stand
- City ***: Suriyawan
- PIN Code ***: 221308

At the bottom of the form, there is a red button labeled "Confirm & Proceed".

Screenshot: journey-12-address-filled.png

13

STEP 13

Tap 'Confirm & Proceed' to save

Tapping 'Confirm and Proceed' saves the address. A toast notification appears: 'Address saved.' The customer is returned to the home page.

Screenshot: journey-13-address-saved.png

Saved address appears in location picker

Tapping 'DELIVER TO' again now shows the saved address under a 'Saved Addresses' heading, with the distance from the restaurant (e.g. '0.72 km from restaurant'). The customer can Edit or Delete it, or add more addresses.

Screenshot: journey-14-saved-address-shown.png

15

STEP 15

Home page -- ready to order

The 'DELIVER TO' bar now shows the selected address (e.g. '12, Main Road, Near Temple'). The customer is ready to browse the menu and place an order.

Screenshot: journey-15-home-ready-to-order.png

Browse the home page

The home page shows the brand hero card, category rail (Pizza, Burger, Sandwich, etc.), Featured Items section, and Popular Near You section. The customer can scroll to explore.

Screenshot: journey-16-home-with-items.png

17

STEP 17

Scroll to see Featured Items

Featured items are displayed in a responsive grid. Each item card shows the image, name, description, price, rating, veg/non-veg indicator, and an ADD button.

Screenshot: journey-17-featured-items.png

Tap 'ADD' on an item

Tapping the ADD button on any item adds it to the cart. The ADD button transforms into a quantity stepper (minus, qty, plus) so the customer can adjust the count. A toast confirms the item was added. The Cart icon in the bottom nav shows a badge with the running count.

Screenshot: journey-18-item-added.png

19

STEP 19

Add more items

The customer can add more items by tapping their ADD buttons, and can adjust quantities using the plus and minus buttons on the steppers. The cart count in the bottom nav updates in real time.

Screenshot: journey-19-multiple-items-added.png

Or tap 'Menu' to see all categories

Tapping 'Menu' in the bottom nav opens the full menu view. It shows a search bar, popular search suggestions (Pizza, Burger, Pasta, etc.), and all categories with their item counts (e.g. 'Pizza -- 4 items').

Screenshot: journey-20-menu-view.png

Tap a category to see its items

Tapping a category (e.g. 'Pizza -- 4 items') opens the category listing. Each item card shows the photo, name, description, price, and an ADD button. Tapping the item card itself opens the detail view with a larger image, full description, and related items.

Screenshot: journey-21-pizza-category.png

ADD button becomes a quantity stepper

After adding an item, the ADD button is replaced by a quantity stepper showing the current quantity with plus and minus buttons. The customer can increase or decrease the quantity without leaving the page.

Screenshot: journey-22-first-item-added.png

Cart with multiple items and quantities

The customer has added multiple items with varying quantities. The Cart badge in the bottom nav shows the total item count (e.g. '3' for 2 pizzas + 1 sandwich).

Screenshot: journey-23-multiple-items-with-qty.png

Tap 'Cart' to review your order

The cart view shows: the delivery address (with 'Change' option), each item with photo, name, price-each, quantity stepper, and Remove button. A '+ Add more items' button lets them continue browsing. The bill breakdown shows Item Total, Delivery Fee, and To Pay. A free-delivery threshold note appears if applicable. A sticky bottom bar shows the total and a 'Place Order' button.

Screenshot: journey-24-cart-view.png

Tap 'Place Order'

If the customer has not yet added a contact number, the app blocks checkout and pops up the Edit Profile modal with the message 'Contact number is required before checkout.' The customer must add a 10-digit Indian mobile number before they can proceed.

Screenshot: journey-25-checkout-payment-options.png

26

STEP 26

Add a contact number (if prompted)

In the Edit Profile modal, the customer enters their 10-digit mobile number (prefixed with +91). The email field is read-only (cannot be changed). After entering the number, they tap 'Save Changes' to save and return to the cart.

Screenshot: journey-26-phone-saved.png

Checkout screen -- pick payment mode

The checkout screen shows: DELIVERY ADDRESS section (with 'Change' link), PAYMENT MODE section with two options -- 'Cash on Delivery' (pay with cash at your door) or 'UPI' (pay via any UPI app on delivery), an ORDER NOTES field (optional, e.g. 'Less spicy, call on arrival'), and a Bill Details summary. A large 'Place Order' button with the total amount appears at the bottom.

The screenshot displays the checkout interface for 'Apna Baithak'. At the top, a navigation bar includes the restaurant logo, delivery time and address, and links for Home, Menu, Cart, and the user profile (Journey Test User). The main content area is titled 'Checkout' and is divided into three sections: 1. DELIVERY ADDRESS: Shows 'Home' at '12, Main Road, Near Temple, Suriyawan - 221308', 0.72 km from the restaurant, with a 'Change' link. 2. PAYMENT MODE: Offers two options: 'Cash on Delivery' (Pay with cash at your door) which is selected with a red radio button, and 'UPI' (Pay via any UPI app on delivery) which is unselected with a white radio button. 3. ORDER NOTES (OPTIONAL): A text input field containing 'e.g. Less spicy, call on arrival...'. At the bottom, a large red button labeled 'Place Order · ₹340' with a right-pointing arrow is visible.

Screenshot: journey-27-checkout-payment-options.png

Tap 'Place Order' to confirm

The order is created and a confirmation screen appears: 'Order Confirmed! Your order AB-2026-0005 has been received by Apna Baithak. We will start preparing it right away!' The screen shows the order number, item count, total, payment mode, delivery address with distance and ETA. A post-order push notification opt-in card appears: 'Get order updates -- Enable notifications / Not now.' Buttons for 'Track my order' and 'Back to home' appear at the bottom.

Screenshot: journey-28-order-confirmation.png

Tap 'Track my order'

The My Orders view shows the order with: order number, status badge (NEW / PREPARING / OUT FOR_DELIVERY / DELIVERED / CANCELLED), date and time, item count, total, and payment mode. A horizontal order status tracker shows the 4 stages: Order Placed, Preparing, On the way, Delivered -- with the current stage highlighted. An ETA estimate and a 'View details' button appear below.

Screenshot: journey-29-orders-tracking.png

Tap 'View details' for full order info

The order card expands to show the full item list with quantities and per-item prices, the complete delivery address with distance from restaurant, and the bill summary (Item Total + Delivery Fee = Total Paid). Action buttons include: Call (dials the restaurant), Reorder (adds the same items to cart), Receipt (generates a PDF receipt, available after delivery), and Hide details (collapses the card). The customer receives push notifications as the admin updates the order status.

Screenshot: journey-30-order-details.png
